

Author Gallery - Upgrade Week Plan

Developer 1 (Frontend Lead) Action Plan

TARGET ROLE: FRONTEND LEAD & CORE UX

1. Scope of Work & Responsibilities

- **Primary Focus:** Reader Interactive Experience, Universal Search (Ctrl+K), App Theme Switcher, Audio Text-to-Speech Player, Personal Bookshelves.
- **Git Feature Branch:** feature/reader-experience
- **Target Workplaces:** frontend/src/context, frontend/src/components, frontend/src/pages, frontend/src/styles

2. Git & Collaboration Commands

```
# 1. Switch to main and pull latest code
git checkout main && git pull origin main
# 2. Create your dedicated feature branch
git checkout -b feature/reader-experience
# 3. Stage and commit your changes
git add . && git commit -m "feat: added distraction-free reading mode modal"
# 4. Push to remote repository
git push origin feature/reader-experience
```

3. Detailed File Implementation Checklist

- **[NEW] frontend/src/context/ThemeContext.jsx:** Global context provider for themes (parchment, dark, sepia, modernLight).
- **[NEW] frontend/src/styles/themes.css:** CSS color custom variables for all background, card, and font color modes.
- **[NEW] frontend/src/components/ReaderComponents/ReadingModeModal.jsx:** Full-screen reading modal with font size slider, line height, bookmarking, and dark/sepia toggle.
- **[NEW] frontend/src/components/ReaderComponents/TTSPPlayerBar.jsx:** Audiobook player bar utilizing window.speechSynthesis for Play/Pause, speed (0.75x, 1x, 1.25x), and audio controls.
- **[NEW] frontend/src/components/SearchComponents/CommandPalette.jsx:** Universal Ctrl+K / Cmd+K instant keyboard search modal across books, authors, and genres.
- **[NEW] frontend/src/pages/MyBookshelves.jsx:** Reader dashboard tab for "Want to Read", "Currently Reading", "Completed", and "Favorites".
- **[NEW] frontend/src/components/BookComponents/BookshelfButton.jsx:** Reusable quick-add button for adding any book to user shelves.
- **[MODIFY] frontend/src/AppRoutes.jsx & navbar.jsx:** Register /bookshelves route, trigger Ctrl+K global keyboard listener, and add theme toggle in navbar.

4. Verification & Testing Steps

- Test Ctrl+K shortcut on Windows and Mac browsers.
- Verify reading progress saving in localStorage / backend API.
- Ensure SpeechSynthesis plays seamlessly across Chrome and Edge browsers.
